Product Designer | B2B SaaS

Product Designer specializing in complex business tools (CRM, Dashboards). I combine a user-centric approach with strong technical proficiency (Design Systems, Integration) to transform dense data into intuitive and scalable interfaces. Focused on business impact and operational efficiency.

Skills

- User journey mapping
- Complex interface design
- Visual hierarchy & design systems
- Visual direction & consistency
- Translating business needs into design solutions
- Design-to-development collaboration

Tools

- Figma (expert)
- Adobe Suite
- HTML / CSS / JS
- Cursor
- Github
- Vercel
- Supabase
- WordPress
- Clickup / Notion
- Google Workspace

Interests

- Ultra-Trail & Running
- Cinema (Sci-Fi, Anticipation)
- New Technologies (AI, No-Code, Hardware)
- Gaming & Web Culture

Mindset

- Problem Solving (Resolving complex problems)
- Product Thinking (Business vision)
- Tech Literacy (Understanding of code & development)
- User-Centric (User empathy)

Educations

Master’s Degree in Digital Art Direction — 2025

Bachelor’s Degree in UX/UI Design — 2023

Professional Certification in Web Development

Experience

VIZION (Freelance) Product Designer & Builder (SaaS Web App) Since June 2025

End-to-end design and development of an Ultra-Trail performance simulator (MVP).

- Complex Data Viz: Design and implementation of interactive 2D/3D visualizations: WebGL Globe (Three.js), dynamic elevation profiles (Highcharts), and vector mapping.
- Product Engineering: Development of full business logic: Biometric file parsing (.FIT/GPX), time simulation algorithms, and Strava API integration.
- AI Integration: Implementation of GenAI features (Mistral API) to provide training analysis and personalized insights.
- User Research & Iteration: Management of a Private Beta phase with weekly iterations based on user feedback loops to refine the UX.
- Stack: Figma, React 18 (TypeScript), Tailwind CSS 4, Supabase (PostgreSQL/Auth), Vercel.

SKYDO DIGITAL Product Designer (End-to-End) March 2022 - October 2025 (3 years & 7 month)

"Responsible for UX/UI design and the evolution of the agency's SaaS products, from client discovery to technical integration.

- B2B SaaS Design (Pedaboard): End-to-end design of a complex business CRM. Simplification of dense data flows and immediate adoption by the business team upon internal deployment.
- Design System & Scalability: Creation and maintenance of an atomic component library (Variables, Tokens), reducing Time-to-Market and ensuring Design/Dev consistency.
- Design QA & Tech: Close collaboration with developers (GitHub, Vercel) to ensure pixel-perfect integration and reduce technical debt.
- Go-to-Market (PlayDaGo): Design and validation of the MVP (Minimum Viable Product) for B2B SaaS commercialization.
